

JUST THE FACTS ABOUT YOUR COMMUNITY

YOUTH Living in York Region

Source: Statistics Canada 2001 and 2006

INTRODUCTION

According to the Statistics Canada 2006 Census there are 126,475 youth (aged 15 to 24) living in York Region - 67,635 are between age 15 and 19 years and 58,840 are between age 20 and 24 years. A slightly greater percentage of youth are male at 52%, compared to female youth at 48%. Youth account for 14% of the total population of the Region. This is only slightly higher than the proportion of youth in Ontario (13%) as a whole. All of the Statistics Canada 2006 Census information is not available at this time. However, the 2001 Census gives many clues about what we can expect from the 2006 Census.

EDUCATION IN 2001

- Among youth aged 15 to 19 years, 27% had a high school graduation certificate as their highest level of education, compared to 24% of the total population (15 years and over).

WHAT this means:

Youth represent the future of our communities. Their energy, ambition, creativeness and diversity are assets that need nurturing. With over 126,000 youth living in York Region as of 2006, it is critical that supports are in place, such as access to education, employment, economic security and affordable housing, so that they have equal opportunity to maximize their potential. York Region's youth have the unique benefit of growing up in one of Canada's most diverse communities. The long term gains from their experience will hopefully be a community which is tolerant, inclusive and embraces diverse cultures and racial groups as immigration continues to be the prime driver of York Region's population growth.

These fact sheets are produced by the Community and Health Services Department, based on Statistics Canada Census data and definitions provided through the Community Social Data Strategy (CSDS). This is an initiative from the Canadian Council on Social Development in partnership with Statistics Canada. In 2005, York Region partnered with key community organizations to form a Consortium to lead the CSDS project.
